IT Number	Student Name	1st Mark	2nd Mark/Final Mark	Comments
IT23155220	Sathsara G.L.A.S	5.5	5.5	The loop is invalid, and values are overwritten,does not compile , number of inputs is wrong,hasn't read the question properly
IT23374188	Ahamed M S A	8	15	sadly, it does not even compile even though the student says that it did, since tehre is an identation error . However , looking at the code it ispossible to give marks after the indentation was solved
IT23387430	W A N Oshad	7	13	It did not get compile , however I did check both of them . Marks can be given for insertion sort, range and displaying hence the marks has been increased.please upload only one answer next time.
IT23165366	ahrthicshan	3.5	3.5	Can reduce marks, it does not compile, due to multiple syntax errors , for j in range(2,n) and n is not even defined at this point!! Invalid syntax in the algiorithm , missing assignment operators,the range is wrong ,invalid map usage , inconsistent use of A and n , at the end print range is wrong as well
IT21039386	G C Dixon	11	8	Too many syntax errors, a lot of them . Does not compile. Marks had to be reduced. Too much given , cuase it does not compile in the first palce, seleciton sort logic is wrong, median formula is wrong, no sorting occuirs, print(range) is wrong, mixes up variable names like A and n.
IT23222236	Tharuki Nethmini	9	9	Eventhough the student claims that almost everything has completed, it does not compile sadly. Marks have been already for the attempt and coding. Cannot increase anymore
IT23154612	Bandara smpk	2	2	There is nothing much to mark in this.
IT23245938	verjith	4.5	4.5	Cannot increase anymore, many errors ,insertion srot is quirte wrong,never disaplys the sorted list,does not even calucalte the middle value
IT23181274	I.Naganarthanan	2	6.5	The code does not compile, however marks were increased the range calc and the dispalying part is correct, other than that cannot increase anymore marks , cause the implementation for the insertion sort is wrong.
IT23266032	M.A.A.Induwari	1	1	the student claims that he or she has answered correctly , however it does not compile. Inputs are wrong, the selection sort logic is wrong, display min max,the student has used len??which is invalid , the sum is not even calcultaed .
IT23331518	P.D.D.M.Pallegedara	6	6	The student has hardcorded the values, a lot of errors , misuse of python built ins , does not compile . Max marks given arleady
